WORLDWIDE
DISTRIBUTOR,

**357, 41, & 44
TDE AUTO MAG**

The worldwide sales and warranty service rights to the AUTO MAG pistol were assigned formally to L. E. Jurras & Associates, Inc. in September, '74. L. E. J. & Assoc. Inc. are truly the AUTO MAG specialist. Lee E. Jurras was founder of the Super Vel Cartridge Corp and innovator of the FIRST commercially available concept of high performance, high velocity centerfire handgun ammunition. Scoring another first, with the domestic availability of the .357 AMP, .41 JMP and .44 AMP in factory loadings; as well as in works R&D on the 30 JMP and .45 JMP cartridges; mark the AUTO MAG as the newest "symbol of hunting handguns". An international handgun hunter and author, Jurras has hunted from Alaska to Africa with the AUTO MAG, and has taken over 115 head of medium and large game with a handgun. In addition to the AMP distribution, L. E. J. & Assoc., Inc. services include the supplying of parts, accessories, custom modifications and tune-ups.

Much was written in the early part of '74 suggesting that the High Standard Co. would buy the manufacturing rights to the AMP. Although High Standard does list the gun and some AMP's were made with their markings, the sale never did actually occur. Instead, in mid '74, the T. D. E. Corp. (manufacturers of the AMP) reorganized and tooled up to produce completely new guns. Thus, for the first time the AUTO MAG will be fully supported by a corporate entity, completely separate from the manufacturing facility. New guns, distributed by L. E. Jurras & Associates, Inc. will carry the conventional T.D.E. markings and will also be emblazoned with the lion's head logo of the Jurras firm.
