ALL 44 AMP'S MUST BE PORTED FOR BEST FUNCTION. ALL UNS COPED 357 AMP'S SHOULD BE PORTED. IF SCOPING IS CONTEMPLATED THE 357 SHOULD BE LEFT UNPORTED. THIS ASSURES SUFFICIENT BBL IMPULSE TO WORK THE ACTION WITH LIGHTER BULLETS OR IN COID WEATHER WITH THE ADDED WEIGHT OF SCOPE. THE LONGER THE BBL THE GREATER THE RECOIL IMPULSE DUE TO INCREASED BBL TIME AND HIGHER VEL. THEREFORE LONGER BBL'S CAN PROFIT MORE FROM PORTING THAN THESHORTER. THE WEIGHTS OF THE 44 AND 357 AMP BBL'S ARE SUBSTANTIALLY THE SAME. THE 44 HAS AROUND TWICE THE RECOIL OF THE 357, AND FOR THIS REASON CAN GET BUY BETTER WITH PORTING.

PRICE OF A COMPLETE TUNE UP IS \$195.00 FOR FT. WAYNE. WITHOUT PORTING \$175.00.

WE CARRY A COMPLETE STOCK OF PARTS AND CAN UNDERTAKE ALMOST ANY KIND OF AUTO MAG REPAIR.
